THINK INTERNATIONAL

France is…

➢ …the country with more partner universities, being available 32 universities for Erasmus exchange, i.e. 29% of total partners available in Europe

➢ …the most wanted country, since during the Year 202/21 it was chosen by 54 out of 227 outgoing students i.e. by 24% of the all Erasmus students and by 28% of those who selected Europe

But pay attention to...

- The campus to which you have access if there are multiple sites

- The semester in which you are doing your exchange (sometimes the 2nd semester is focused on internships)

- The courses you have access to as Erasmus student

- Whether the courses have limited enrollments (in case be quick!)

- Whether there is a minimum of credits to be accomplished (please note: if you are obliged to attend a course to learn French language, this will not be recognized)

- What course combinations are allowed across modules and/or masters

   and/or department

- The language of the courses

What if...

- A course is cancelled before going to France or while being there?

    • No panic! contact me and propose a new exchange

- I don't find enough substitutions abroad?

    • We can exploit the 10 ECTS FREELM as generic credits

    • You can attend one (or more) Polimicourses at distance

- The beginning of the courses in France overlaps with the exams at Politecnico di Milano?

    • Contact the professors of Politecnico di Milano and ask them to make the exam at distance and/or alternative types of exams

So… KEEP CALM and enjoy France!

https://www.campusfrance.org/en

Spain and Portugal: attention points!

4) No one keeps the initial and first Learning Agreement
- closed number of courses
- courses do not start
- courses with pre-requisites

Do not despair!

→ WeatPolimi are flexible (not always so in the partner university)
→ If you are at the Masters, you can leverage on the FREE courses in the study plan

If you believe this is a **GREAT LIFE EXPERIENCE**,
then difficulties are not an obstacle to jumping into it...
