Analyzing the «Design Management» field: 2000s and 2010s ...

Management and Design

Vision

*“We live in a **world awash with ideas**. Thanks to open innovation, crowdsourcing, and especially to digital technologies, we have easy access to an unprecedented amount of novel opportunities. How to make sense of this overabundance of opportunities? How to **envision the next big thing**? How to avoid trying everything and fall into the paradox of ideas (the more ideas we create the less we innovate)? To succeed in an overcrowded world **we need a meaningful direction**. To focus our creativity and the creativity of others towards a new, shared purpose.”*

Roberto Verganti – Politecnico di Milano

Design Thinking

*“Design thinking is a **human-centered approach** to innovation that draws from the designer's toolkit to integrate the needs of people, the possibilities of technology, and the requirements for business success.”*

Tim Brown – IDEO

*“The way I think about design thinking is it is in a halfway house between **analytical thinking**, for the purely deductive and inductive logical thinking that utilizes quantitative methodologies to come to conclusions, and **intuitive thinking**, knowing without reasoning. And design thinking is the kind of thinking that takes the best of both sides. So what it takes is invention of the future from the intuitive thinking and the willingness to use what I call abductive logic – inference of the best explanation. As well as some aspects of the power of inductive and deductive logic from analytical thinking to produce something that is creative but replicable”*

Roger Martin – Rotman School of Management at the University of Toronto

Alumni from the first two editions

X-shape design

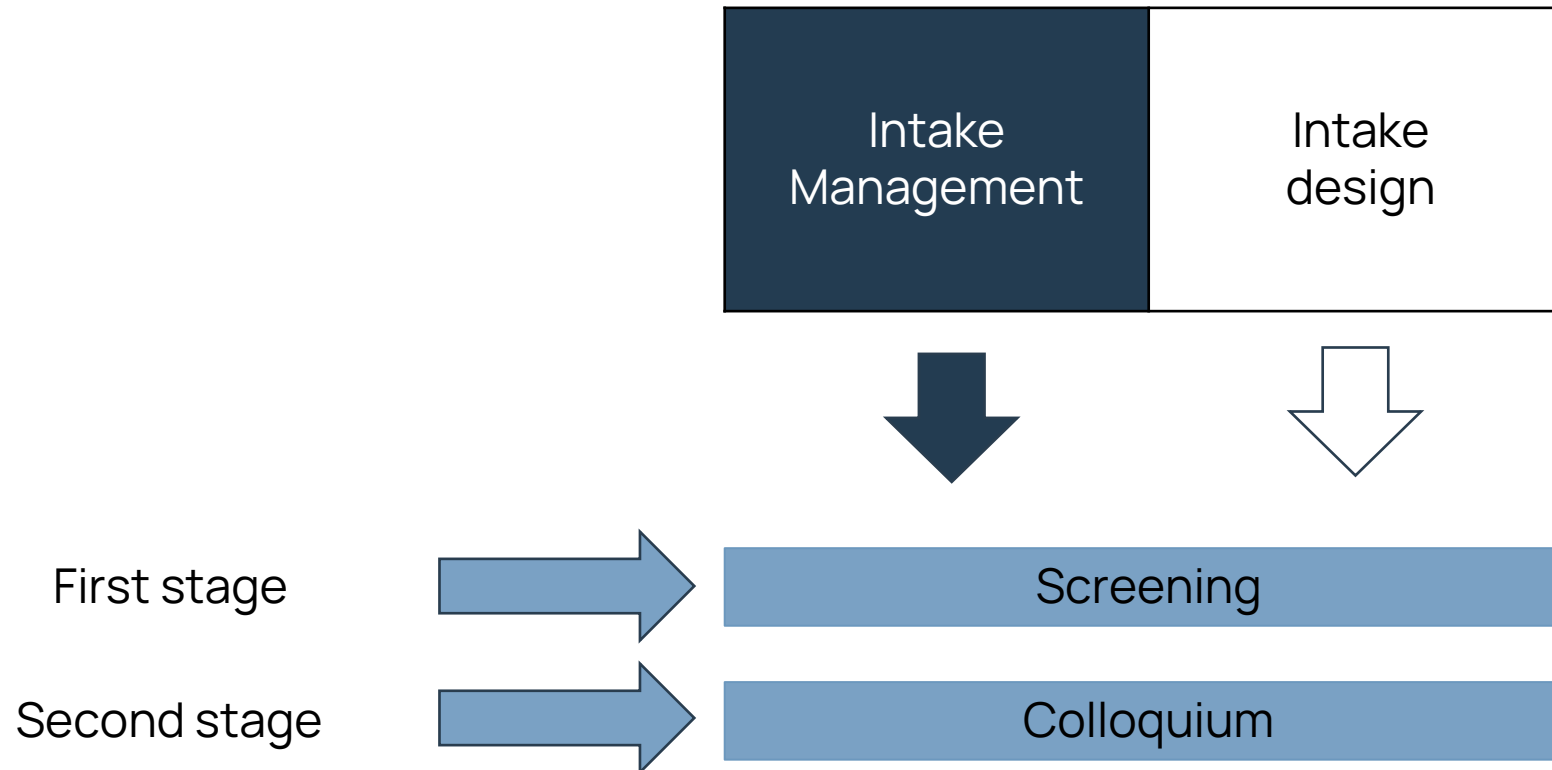

Intake PSSD (Design)

Internal Double Degree: Selection process

- Evaluation based on a two stage process: **Screening** and **Colloquium**
- Only students that pass the Screening stage will access to the Colloquium

Internal Double Degree: Selection Process– Screening

Screening, based on:

- A **motivation letter**, explaining why the candidate is willing to attend the Double Degree Program and how she/he may contribute to the community of the Program
- **Curriculum Studiorum** in the Bachelor Degree (self-declaration of transcripts with mark and **finale degree grade** and **abstract of the thesis** (not more than 5 standard word pages) and a self declaration of transcripts of the first semester of the MSc study course
- **Curriculum Vitae** indicating other competencies developed (beside the Curriculum Studiorum) and how they were developed. Competencies may include: core competencies in the field (e.g. project portfolios), competencies developed in the second degree field (e.g. working experiences), tools and methodological experiences, hobbies etc.
- **Projects portfolio**

Internal Double Degree: Selection Process– Colloquium

Joint Colloquium, aimed to evaluate:

- The **coherence of the expectations** and the **motivations** of the candidate with the objective of the double degree program
- The **coherence of the specific competencies** acquired by the candidate in the bachelor level and through extra-curricular experiences with the objective of the double degree program
- The candidate's **attitude towards the disciplines** of the double degree program (which could be assessed through interview questions or a case study)

Dates

- Presentation of candidate applications: by December 14th, 2020 at 12.00 (noon)
- Notification of the results of the screening stage: **December 21st**, 2020
- Selection process and interviews: between January 11^o and 15th, 2021 (**14 Jan. TBC**)
- Publication of the final results: by **January 26th**, 2021
- Acceptance by candidates: from **January 26th** to **February 3rd**, 2021

Alumni from the second edition

Gianluca Carella

2nd Edition

Internship in F-Lab

Thesis on how design can support processes inside organizations that are adopting Open Innovation

Now PhD candidate in the Department of Design
