MSc in Management Engineering PoliMI: Structure overview

- From September 2021, the new offer, constituted by 14 majors, will be available to **all our MSc students**.
- With the new offer, the second year will be articulated into:
major (25 ECTS) + elective courses (20 ECTS) + thesis (15 ECTS)
- In order to ensure the interdisciplinary vocation of the MSc programme, at least **10 ECTS** should be obtained through subjects that belong to disciplinary sectors (SSD) other than characterizing sectors (ING-IND 35; ING-IND 17).

Study Plan Deadlines

Study Plan Presentation:

from August 31st, 2021 to September 24th, 2021

The transition from the «old offer» to the «new offer»

- In September, the study plan of students enrolled in the 2020-21 academic year will be automatically allocated to one of the 14 majors (the one which is closer to the original stream).
- This allocation is **temporary** and it is necessary just for managing the transition from the «old offer» to the «new offer», that is broader and more flexible than the previous one.
- In September, students will have the possibility of **selecting the major they wish to follow** for completing their MSc.
- As follows, three different possible situations are illustrated.

Preparation of the study plans: Case 1

If you have not included any second year subject in your study plan in the a.y. 20-21

- When preparing your study plan, you will be able to select any major, whatever subjects you have in your first year plan, **without presenting an autonomous study plan.**
- You will have just to follow the structure: **major (25 ECTS) + elective courses (20 ECTS) + thesis (15 ECTS)** and remind to include at least **10 ECTS** through subjects that belong to disciplinary sectors (SSD) **other than characterizing sectors** (ING-IND 35; ING-IND 17).

Preparation of the study plans: Case 2

If you have included one or more 2nd year subjects in the study plan in the a.y. 20-21 and the “anticipated” subjects are present in the new offer

- You can select a major that already includes the anticipated subjects or equivalent subjects among the 25 characterizing ECTS without presenting an autonomous study plan (a list of the equivalent subjects is provided at the end of this presentation).
- You can select any other major adding the anticipated subjects or equivalent subjects among the 20 elective ECTS without presenting an autonomous study plan.
- If the number of ECTS of the anticipated subjects exceeds the space available for the elective ECTS, you can present an autonomous study plan that will be subject to evaluation.
- Please, remind to include at least **10 ECTS** of subjects that belong to disciplinary sectors (SSD) **other than characterizing sectors** (ING-IND 35; ING-IND 17).

Preparation of the study plans: Case 3

If you have included one or more 2nd year subjects in the study plan in the a.y. 20-21 and the “anticipated” subjects are no more present in the new offer (and there is no equivalent subject)

- You can include the anticipated subjects among the 20 elective ECTS.
- If the number of ECTS of the anticipated subjects exceeds the space available for the elective ECTS, you can present an autonomous study plan that will be subject to evaluation.
